PROGRAM BOOK

8th INASCRS

Biennial Scientific Meeting 2026
In conjunction with INACORS

13-14 November 2026 | Pullman Central Park Jakarta

Background

The 8th INASCRS Biennial Meeting in conjunction with INACORS is a premier ophthalmology event that brings together experts in cataract, cornea, and refractive surgery from Indonesia and around the world. The meeting features a range of activities, including symposiums, plenary lectures, the INASCRS Film Festival, free paper and e-poster presentations, and an exhibition showcasing the latest products and technologies in ophthalmology.

The event will be held on November 13-14, 2026, at the Pullman Central Park Hotel, Jakarta, feature renowned international and national speakers who will share their expertise and latest research in the field of cataract, cornea, and refractive surgery. The symposiums and plenary lectures will cover a wide range of topics, providing attendees with a comprehensive update on the latest developments and best practices in ophthalmology. The INASCRS Film Festival will showcase innovative surgical techniques and approaches, offering a unique learning opportunity for attendees.

The event is expected to attract up to 1000 participants, primarily ophthalmology specialists from Indonesia, and is supported by leading pharmaceutical and medical device companies in the field of ophthalmology. The 8th INASCRS Biennial Meeting in conjunction with INASCORS promises to be an unforgettable event, providing a platform for networking, learning, and collaboration among ophthalmology professionals.

Welcome Message

Greeting,

It is my honor to welcome you to the 8th INASCRS Biennial Meeting in conjunction with INASCORS, a premier event in the field of ophthalmology in Indonesia. This symposium/conference will focus on the latest advancements in cataract surgery, refractive surgery, and cornea, and will bring together renowned experts, researchers, and practitioners to share their knowledge and experiences.

The meeting will be held on 13-14 November 2026 at the Pullman Hotel Central Park Jakarta, a perfect venue for learning, networking, and collaboration. Our comprehensive program features keynote lectures, panel discussions, and hands-on workshops, covering a wide range of topics in cataract surgery, refractive surgery, and cornea. Additionally, we are excited to announce the INASCRS Film Festival, where participants can showcase their innovative techniques and share their expertise through video presentations. We also invite submissions for free papers and e-posters, providing opportunities for young researchers to present their work and receive feedback from experts.

I would like to express my gratitude to our sponsors, partners, and supporters for their contributions to the success of this meeting. I also extend my warm welcome to all participants, and I look forward to engaging discussions, fruitful collaborations, and a memorable event. Together, let's advance the field of ophthalmology in Indonesia and improve patient outcomes.

Sincerely,

Ricky E. Rooroh, MD
Organizing Committee, Chairman

Krill Oil kaya akan asam lemak **omega-3 EPA dan DHA** yang mirip dengan minyak ikan. Namun, minyak krill masih dianggap **memiliki khasiat yang lebih tinggi** daripada minyak ikan, mungkin karena 30%-65% asam lemaknya adalah dalam bentuk fosfolipid yang **lebih mudah diserap** dalam tubuh manusia dibandingkan dengan trigliserida.

Krill oil is similar to fish oil that is rich in **omega-3 EPA and DHA.** But, krill oil is still perceived as having **higher efficacy than fish oil,** probably because 30%–65% of its fatty acids are in phospholipids form which are **easier to be absorbed and transported** in the human body compared to triglycerides.
